

Assignment 6

Due: 11/08/2017

(1) Ch. 16 (Pg.510) - #'s: 40, 46, 49, 61, 64

(2) **Extra Credit:** Clearly explain, in your own words, why switching in the Monty Hall Problem is better. [Hint: The easiest way (but not the only way) to think about this is to first determine in which scenarios do you lose if you switch.]
